German General Social Survey 2010

English Translation of the German "ALLBUS"-Questionnaire

German General Social Survey 2010

English Translation of the German „ALLBUS“–Questionnaire

PRELIMINARY NOTES
Translation goals always effect the translation outcome. The goal of the English translation of the German Social Survey (ALLBUS) 2010 is to let interested researchers know what was asked in the survey. Our goal is not to produce a questionnaire that can be fielded in an English speaking community exactly as presented. Some of the translations, for example, are not especially idiomatic; reasons are given below. Our translations are not heavily annotated. Occasionally we provide additional information in square brackets […]. If anyone wants to field ALLBUS items in English, we seriously recommend to take the points we made below into consideration and adjust the translations appropriately to his or her own survey context. If there are any questions where clarification is needed, we will be happy to help where possible.
Together with the ALLBUS 2010 study the modules for 2009 (Social Inequality) and 2010 (Environment) of the International Social Survey Programme (ISSP) were fielded in a split. The English ISSP source questionnaires can be found on the ISSP website www.issp.org (“Archive and data”).

We would like to take the opportunity to thank our translator for his patience and his valuable professional contribution. David Allison, a native English speaking translator, did the translation into English, decisions on the final translation are taken by the ALLBUS-team.

Particular points of relevance
Translation of the German indefinite pronoun ‘man’ which in some respect is like the English indefinite pronoun ‘one’:
The German ‘man’ is not formal and used in more and different contexts from ‘one’ in English. English equivalents, depending on context, can be ‘one’, ‘you’, ‘we’ or ‘people’.
Gender specific reference:
German and English differ quite a lot in the way the sex of people is referred to. Various differences have meant that we sometimes translated with 'he/she' when the German has indicated the sex differently.

Answer scales:
Translation of answer scales is a special case (Harkness 1998)\(^1\). For some scales, we have attempted to provide translations that might actually work in an English field questionnaire. For other scales, where the German scale itself was perhaps unusual, we simply tried to translate the essence.

Answer categories not read out (Don’t know (DK), etc.):
The ALLBUS 2010 was mainly conducted as a computer-assisted-personal-interview (CAPI) and nonresponse categories such as 'answer refusal', 'don’t know' or 'no answer' were not read out to respondents.

Compared with how others live in Germany:
Do you think you get your fair share, more than your fair share, somewhat less or very much less than your fair share?

- Fair share
- More than fair share
- Somewhat less
- Very much less
- Don't know

Now think of your personal situation:
All things considered have your ideas of what you wanted to achieve in life been ...

- more than fulfilled?
- fulfilled?
- nor quite fulfilled?
- or not at all fulfilled?

What do you think: does everybody in Germany today have the chance to be educated in keeping with their talents and abilities?

- Yes
- No
- Don't know
Here is a card with various views on what social differences in Germany are really like and how things should be. Please go through these one by one and tell me whether you:

- completely agree
- tend to agree
- tend to disagree or
- completely disagree.

Don’t know

A. What one gets in life depends not so much on one's own efforts but on the economic situation, the situation on the employment market, wage agreements, and the social benefits provided by the state.

B. Income should not be based solely on individual achievement. Instead, everybody should have what they and their family need for a decent life.

C. Only when differences in income and in social standing are large enough is there an incentive for individual achievement.

D. Differences in status between people are acceptable because they basically reflect what people have made of the opportunities they have had.

E. On the whole, I consider the social differences in our country just.

F. The state must ensure that people can live a decent income even in illness, hardship, unemployment and old age.

---

If the federal government had to decide between reducing taxes or spending more on social services, which do you think it should do:

- Reduce taxes
- Spend more on social services
- Don’t know

---

Some people say that we have more than enough social benefits in Germany today and that they should be cut back in the future. Other people think that we should keep the current system of social provision and if necessary extend it. Have you formed an opinion on this issue?

- Yes
- No
What is your opinion?
Should social benefits be cut in the future, should things stay as they are, or should social benefits be extended?

Should be cut
Should stay as they are
Should be extended

It is often said that there are conflicts of interest between different groups in Germany, such as between political groups, between men and women, etc. These conflicts are not all equally strong.
I am now going to mention a few such groups.
Using this list, please tell me whether in your view these conflicts are ...

Attend a full-time school (pupils and students),
Are registered as unemployed or
Draw a retirement benefit / pension as a result of previous employment.

Persons on maternity / parental leave or on another type of leave of absence are not considered employees in a regular occupation.

GENERAL NOTES TO ISSP MEMBERS

1. All notes which are not part of the questionnaire and intended only for members (for example, translation notes, TN) are enclosed in double, square brackets [[like these]].

2. All the elements in questions which require local adaptation are enclosed in angle brackets. These instructions often relate to adding the name of the relevant country. For example, in Australia “Generally, how would you describe taxes in <country> today?” would read “Generally, how would you describe taxes in Australia today?”

3. Every question starts with a reference between square brackets to earlier Social Inequality questionnaires: A=1987, B=1992, C=1999, D=2008 (=pretest). The reference also contains the ITEM NAME (which refer to names in merged datafile). For example: [[AHEAD16: C,D]] “To get all the way to the top in <country>, you have to be corrupt.” This question was only asked in the Social Inequality module 1999 and in the pretest 2008.

4. For questions for which no “Can’t choose” is provided, code non-productive or missing answer to -99.

6. The Social Inequality IV module proper consists of 47 attitudinal questions and 13 background questions. To be consistent we also present 3 standard background questions that are strongly related to the module questions. In addition, we offer 4 background questions and 6 attitudinal questions as options. Note that according to ISSP rules the 47 attitudinal questions of the module proper need to be presented to the respondents consecutively, the background questions, both standard and optional, as well as the optional attitudes can be put in where it fits best. Our recommended order is: {Q24abc}, Q1-Q14ab, {Q22ab}, Q15ab, Q16abc, Q17, {Q25abc}, {Q23ab}, Q18, Q19ab, Q20, Q21ab. Variables in curly brackets {} are optional.

BACKGROUND QUESTIONS

[[TN: The background questions can be asked separately from the attitudinal questions. Country specific wording is allowed as long as it gets this information. Like other demographic and background variables, the questions can be put wherever you like in the questionnaire — they need not be with the other ISSP questions.]]

[[TN: The age reference — “when you were <14-15-16>” in the questions below — should preferably be age 15 (PISA age). Relevant arguments to deviate are (A) when the question of similar questions have been asked with a different referent age, and the alternative choice would make the questionnaire more consistent, (B) when age 14 or 16 is clearly more relevant in terms of educational or labor market choices.]]

[[TN: Countries that expect the categories in Q15a, Q16b, Q18a and Q19a not to fit their national situation, should add country specific codes. Examples: collective farming in (post)communist countries, helper in family business/farm, apprenticeships as first jobs.]]

[[TN: Answers to open alternatives in Q15a, Q16b and Q18a – if included – should be post-coded.]]
